Continuation of 5. does NOT place the application in condition for allowance because: With respect to applicant's arguments regarding Yamaguchi not being directed to a reprograhic device, from the equipment set up shown in fig. 29A in combiantion with the teachings at col. 5, I. 64-col. 6, I. 1, one of ordinary skill in the art would have been able to reproduce a document for distribution to participants. Wit respect to the hand movement argument, applicant has disclosed in the specification (p. 5, II. 13-23) that this is a minor adjustment for detecting motion, Yamaguchi teaches that the hand movement is associated with the presentation of the document (col. 15, II. 23-25). One of ordinary skill in the art could have taken the teaching of Yamaguchi and used the infrared sensor taught by Yamaguchi to achiev motion detection of a document. The modification is so minor that applicant's specification provides no details of how the motion detection is performed. With respect to applicant's arguments that Hecht's marks do not contain identification information or processing instructions, applicant is directed to col. 8, II. 1-15, which shows clear identification of the the document and col. 6, II. 35-45, for Hecht's teaching of processing instructions. As stated in the office action, the examiner is using the voice commands of Russell as a well known substitute of the keyboard instructions of Hecht.

Continuation of 10. Other: Applicant states that 22 claims were originally filed and that the claim numbering is proper. However, in the file wrapper before the examiner the specification has 14 pages. On page 14, there are eleven lines of claim 20 continued from page 13 and there are 3 lines of claim 21. No where else on the page is there listed a claim numbered 22. If Applicant filed 22 claims, he is requested to identify the page and line number of where claim 22 is located. As the matter now stands, claim 23 will be numbered as claim 22. So claims 1-22 are pending for purposes of appeal.
